SUSPECT MRBM SITE UNDER CONSTRUCTION NEAR  
VELIKOYE SELO, USSR\*

A suspect MRBM site under construction has been identified in a wooded area at 59-31-20N 37-11-40E, 5.5 nautical miles (nm) east of Velikoye Selo and 33 nm NW of Cherepovets. Its geometric configuration is similar to the newly identified rectangular MRBM site at Rista. The site includes four cleared areas resembling pads and an associated road network.

A scarred area, which may be a future support facility, is located approximately 1,000 feet to the SSE. No good access road is visible. However, a narrow road leads south from the site and joins with a road paralleling the Shulma River.

No matching MRBM site has been identified in the surrounding area. The suspect site is far removed from previously confirmed MRBM deployment activity.
